The Ministry of Transportation supports a positive business climate by planning, managing and maintaining a safe, efficient, reliable and integrated transportation network. The ministry sets safety standards, establishes and enforces road user safety regulations; sets design and maintenance standards; and manages construction and maintenance activities on the provincial highway network. The ministry also works with other governments to coordinate and integrate transportation networks to promote harmony in policies and regulations. Promoting a safe and efficient multi-modal transportation system that protects the public's investment in the provincial highways and promotes public transit continues to be the key priority.
